THE ALUMNI REVIEW

Volume III

MAY, 1915

Number 8

OPINION AND COMMENT

Edward Kidder Graham, formally inaugurated President on Wednesday, April 21, requires no word of introduction or commendation to the alumni of the University. For twenty-one years he has been known to the student body, and for sixteen years he has served the University in many capacities. His record is at once the pride of the sons of the institution over which he is to preside and the basis of their hope that Alma Mater, under his leadership, will greatly promote the welfare of the commonwealth that nourishes her.

□ □ □

The significance of the inauguration is not to be found in the honor shown the University by other societies and institutions, though this was signal. Every section of the country paid high tribute to the work done here by the presence of a total of more than a hundred personal representatives. Nor does it lie in the good will widely voiced by the press throughout the State and nation, nor even in the splendid spirit of student body, faculty, alumni and State, which everywhere expressed itself. It is to be found rather in the fact that the University, which from 1875 to the present has steadily struggled up to a position in which it can serve largely, was, "with all its powers and all its energies, through the simple ceremonial, reverently and passionately further dedicated to the civilization that it exists to serve."

□ □ □

As has already been indicated, in attempting to realize this further self-dedication the University has today a tremendously effective asset—faculty and student co-operation. Without thought of remuneration or regard to the physical discomfort involved, members of the faculty within recent years have gladly assumed the additional burdens of lecturing throughout the State, of editing bulletins, of issuing the *News Letter*, of carrying on correspondence courses, of answering numerous requests and of participating in many activities outside of the regular work of the University. From the point of view of its rarity in other institutions, the co-operation of the student body has been even a greater asset. With-

PRESIDENT GRAHAM

WHAT IT MEANS

FACULTY AND STUDENT AID

in the present year three hundred visitors attending the High School Debates have been entertained by it. From October until the present time county club members have constantly worked on home county problems for no other purpose than to carry the University in useful service back home. During the Christmas holidays many of the home-returning boys entertained the home alumni in order to better inform them of the work of Alma Mater and on the day of President Graham's inauguration three hundred of them gladly gave up their places at Swain Hall in order that the guests of the University might be fittingly entertained, sixty-two of them volunteering to serve as waiters at the luncheon. Herein is something which brings strength to the arm of the University, and something which it receives more largely than any other institution in the country.

□ □ □

The University is also deeply conscious of the fact stated by Mr. Stephens in his greetings from the alumni that there is among the alumni a splendid feeling of co-operation, a keen desire to be of intelligent help. It knows too that in spreading its influence and deepening its power and fruitfulness the alumni can render tremendous service. But notwithstanding this, it realizes as do the alumni that this splendid potential force which exhibits itself here and there in loyal expression has not as yet been fully caught into the steady sustaining current that would be great enough to send the University forward with irresistible power.

□ □ □

Here is the great fact for the alumni. Everybody realizes it. The question is, what can be done to get into the University the spirit, the sound sense, the practical help of the great scattered army of her sons; and what can be done to give to them her spirit and ideals and definite purpose. In the hope of answering this question, here is a plan that will be put through at this commencement.

Tuesday, June 1, is Alumni Day. Immediately after the alumni address and class re-unions, an Alumni Conference will be held with the topic "What the Alumni Can Do to Help the University in Its

ALUMNI CO- OPERATION

ALUMNI CONFERENCE

Work." This is not to be an oratorical contest, nor a meeting for the election of officers and reading of the minutes of last meeting. It is to be a conference of people equally interested in the management of the greatest enterprise in North Carolina, who have the faith that if it can draw together all of the strength that it has, it can be the greatest enterprise of its sort in the country. Straight-from-the-shoulder talk, brief, sincere, is what is wanted with the thought that we are all at work on the same big job and will not be misunderstood, even if we may be disagreed with, and that ideas and ways and means are what we are after and nothing else.

□ □ □

Here is the great chance and Tuesday, June 1, at twelve o'clock is the time. Come to this meeting even if you have but the one day **BIG BUSINESS** to spend at commencement. Don't let business interfere. This is big business. Write to your friend that you know is interested in the University and tell him to meet you there. Talk it over with the alumni in your town and if there is an alumni association, have a meeting with this as a topic and bring a message from that meeting.

□ □ □

A great many requests have come from alumni and others for a copy of the addresses made at the inauguration ceremonies. A full account of the proceedings is now being prepared and will be published. **AN OPPORTUNITY, NOT A REQUEST** What the Committee would like to do is to make this publication worthy of the occasion—a volume to be preserved permanently and to present the University adequately to the whole nation. To put it in this form will cost. Is there an alumnus who would like the opportunity to perform this fine service to the University and to the State? Or is there a group of alumni who would undertake to guarantee the money? This is not a request; it is an opportunity!

□ □ □

In answer to the communication appearing in the last issue of *THE REVIEW*, Lawrence S. Holt, Jr., **HEARD FROM** has heard from a number of alumni saying they would subscribe for one copy of an alumni catalogue at such a price as the committee on publication considered reasonable and would also contribute \$5 or \$10 to the general publication fund. Here, seemingly, is a way by which the publication can be secured. In any attempt which the alumni may make towards a more vital co-operation with the University, this publication is

absolutely essential. Write Mr. Holt your ideas about it and come to the conference prepared to discuss this and any other topics which are in harmony with the purpose of the meeting.

□ □ □

Alumni, attention! An innovation which has been decided upon for the approaching Alumni Luncheon in Swain Hall, at 1:30 P. M., June 1, is that alumni will have the privilege of being accompanied at the Luncheon by their wives and guests, and that they will be charged \$1.00 per plate each for themselves and those accompanying them. Tickets can be secured in advance by sending a check to E. R. Rankin, Chapel Hill, N. C. Music, stunts by the students and alumni, and a good time in general are promised.

COMMENCEMENT PROGRAM

The program for Commencement May 30, 31, June 1, 2, 1915, as announced by the University, promises to be of genuine interest, and reports from the alumni indicate that the alumni features of the occasion will be of the worth while order.

Reduced rates for the occasion have been secured from points in Virginia and North Carolina, and the train between University and Chapel Hill will make an extra trip for the Hill, leaving University at 9:10 A. M.

Sunday, May 30

11:00 A. M. Baccalaureate sermon, Bishop, J. A. McKay, of Alabama.

8:00 P. M. Sermon before the Young Men's Christian Association.

Monday, May 31

9:30 A. M. Seniors form in front of Memorial Hall and march to Chapel for prayer.

10:30 A. M. Senior Class-Day exercises in Gerard Hall. Orations by members of the graduating class in contest for Mangum medal.

5:30 P. M. Exercises under Davie Poplar.

7:30 P. M. Annual joint banquet of the Dialectic and Philanthropic Literary Societies in Swain Hall.

9:30 P. M. Anniversary meeting of the Literary Societies in their respective Halls.

Tuesday, June 1

10:00 A. M. Alumni Address, by R. D. W. Connor, '99, Secretary of the North Carolina Historical Commission. Class reunion exercises of the classes of 1865, 1890, 1895, 1905, 1910, 1914.

12:00 M. Conference of Alumni to discuss ways in which the Alumni can aid the University in its work.

1:30 P. M. Alumni Luncheon in Swain Hall.

4:00 P. M. Baseball game and out-door "Stunts" by "Old Grads."

8:00 P. M. Annual Meeting of the Board of Trustees in Chemistry Hall.

8:30 P. M. Annual debate between representatives of the Dialectic and Philanthropic Literary Societies.

10:00 P. M. Reception in the Bynum Gymnasium by the President and Faculty.

Wednesday, June 2

10:45 A. M. Academic procession forms in front of the Alumni Building.

11:00 A. M. Commencement exercises in Memorial Hall. Address by Judge Mitchell A. Palmer, of the District of Columbia. Announcements by the President. Degrees conferred.

THE SUMMER SCHOOL

Plans for the University Summer School have just been issued in a special announcement by Director N. W. Walker. The session for 1915 will begin June 15 and continue through July 30.

Courses will be offered in English, History, Latin, Greek, German, French, Spanish, Mathematics, Physics, Chemistry, Botany, Geography, Geology, Library Science, Drawing, Writing, Music, Agriculture and Nature Study, Home Economics, Physiology, Hygiene, Plays and Games, Story Telling, Primary Methods, Grammar Grade Methods, School Administration and Supervision, Educational Psy-

chology, and Education. A two-teacher Practice School will be conducted regularly and a faculty of 46 members will offer instruction.

Several new features which will add to the effectiveness of the school have been added. Among these are two special institutes of three weeks each, which are to be conducted for the benefit of those who meet the requirement of attending an institute for three weeks at least once in two years. In this way those attending the institutes will have the opportunity of hearing the public lectures of the school as well as carrying on the prescribed work of the institute. It will also enable those who spend the entire six weeks to carry on their work steadily without interruption incident to the hitherto constant changing in the composition of the classes. The first institute will begin at the opening of the term and continue for three weeks, to be followed immediately by the second.

For the second time the school will offer credit courses for the A. B. and A. M. degrees. In fact every course offered this year will lead to some specific credit, ranging from the certificate for institute attendance up to the A. M. Special conferences on Rural Life, July 5-10, and on High Schools, July 12-17, have been arranged. The special speaker from a distance for the former will be Dr. William A. McKeever, of the University of Kansas.

Special railroad rates are offered and the total expense for the six weeks at Chapel Hill will be only \$30 or \$31.

PRESIDENT GRAHAM INAUGURATED

Educators, Officials of State, Trustees, Faculty, Alumni, Students, and Visitors Participate in the Notable Exercises

In the presence of the most notable assemblage of educators, State officials, trustees, alumni, and visitors ever gathered in North Carolina, Edward Kidder Graham, formerly Librarian, Professor of English, Dean, and Acting-President, was formally inaugurated as President of the University, Wednesday, April 21.

Academic Procession

The exercises of the day began sharply at 10:30 o'clock when the academic procession, under the direction of Grand Marshal Joseph Hyde Pratt, moved from various points on the campus past the Alumni Building to Memorial Hall, 1,400 persons being in the line of march. The order of the procession follows:

First Division: Student body, with exception of graduates and seniors; T. C. Linn, '16, Marshal.

Second Division: The Class of 1898; Richard S. Busbee, '98, Marshal.

Third Division: Alumni of the University of North Carolina; Albert L. Cox, '04, Marshal.

Fourth Division: County and city superintendents of North Carolina schools, and teachers in public and private schools; Professor N. W. Walker, Marshal.

Fifth Division: Council of State, State officers, committees and members of the General Assembly; Dr. Charles Lee Raper, Marshal.

Sixth Division: Trustees of the University; Dr. James M. Bell, Marshal.

Seventh Division: Members of the Graduate School and Senior Class of the College; D. L. Seekinger, President Graduate School, and George Eutsler, President Senior Class, Marshals.

SPEAKERS PARTICIPATING IN THE INAUGURAL CEREMONIES

Eighth Division: Justices of the Supreme Court of North Carolina; Professor P. H. Winston, Marshal.

Ninth Division: Delegates of learned and professional societies and associations in the order of seniority of their organization; Professor Parker Haywood Daggett, Marshal.

Tenth Division: Delegates of universities and colleges in the order of seniority of their organization; Dr. Charles H. Herty, Marshal.

Eleventh Division: Faculty of the University of North Carolina; Dean Marvin Hendrix Stacy, Marshal.

Twelfth Division: Ex-presidents of the University of North Carolina, the President-elect, Governor of the State, and speakers; Dr. J. G. de Roulhac Hamilton, Marshal.

Inaugural Exercises

Within Memorial Hall, thronged beyond its capacity, His Excellency, Governor Locke Craig, presided. He presented Bishop Edward Rondthaler, of the Moravian church and long connected with Salem

Academy and College, the second oldest school in North Carolina, who delivered in a most impressive manner the invocation.

In a brief introductory address, Governor Craig sounded the keynote of the exercises—the dedication not only of a man to the high office of President, but the rededication of the University and her sons to the service of the State.

“We come,” he declared, “to dedicate a man to his work. It demands the energy of his life always steadfast to the high obligation that he assumes. The task calls for the noblest; for it is the keeping and the development of this institution sanctified by tradition, potential for infinite good.

“On this day of the inauguration of the new President, by simple ceremonial we devote anew this University to the service of men, and in this time of militant altruism significant of human destiny, with victorious assurance we give the forward order. We raise him to this exalted place because he is worthy of our past, equal to the opportunities of the future, and because he will lay upon the altar of this his Alma Mater, a priceless sacrifice, essential in every

DELEGATES AND REPRESENTATIVES OF LEARNED SOCIETIES, COLLEGES, AND UNIVERSITIES ATTENDING
THE INAUGURATION

scheme for the redemption of men; a pure and earnest life."

Governor Craig then introduced the distinguished speakers, who spoke on the general theme "Aspects of Higher Education." Dr. Abbott Lawrence Lowell, President of Harvard University, who as the first speaker was to discuss "Culture," was unavoidably detained. He was represented, however, by Professor Charles H. White who, later in the exercises, presented the greetings of Harvard.

Dr. Frank J. Goodnow, President of Johns Hopkins University, explained the function and place of "Research" in the American college. He declared that man could not arrive at the many problems of life exclusively through thinking processes. "I think it is fair to say, then, that the common attitude of man towards the phenomena of life has been one of what we may call thoughtfulness. He has speculated rather than observed, theorized rather than experimented."

With man's growing interest in science, a different mental attitude has been manifested, and this changed attitude has had a marked effect upon our educational ideals and methods. To quote President Goodnow further: "In the first place I think we may properly say that the modern educated man, the scholar, if we may use that much abused term, is a much more modest man than was the case with his

forebear. He distrusts broad generalizations, he abhors general theories, he has no faith whatever in panaceas for the ills from which society suffers. He is convinced that every addition to our knowledge must come as the result of painstaking observation rather than of brilliant thinking.

"In a word I think we may say, that the most remarkable concrete manifestation of this changed intellectual attitude is that the scholar and the practical man have come closer together. We endeavor probably more than ever before, to inculcate in those who are being educated the desire to find out as the result of research and investigation what are the actual facts and what is the real truth. We must of course curb our enthusiasm for research and investigation so that it will not lead us to neglect other things of value. We must remember that we have a past as well as a future; that we even now know many things although we have much to discover and learn. We who have the young to teach must not forget our charges in our pursuit of the unknown."

President Alderman

Dr. Edwin Anderson Alderman, President of the University of Virginia, was the next speaker. His appearance on the platform called forth prolonged applause, and he was heard with great pleasure as he discussed with matchless charm and grace the

theme of education and democracy, as "Education in Service." After tracing briefly its progress in the nineteenth century, Dr. Alderman thus defined democracy:

"Conceived of as a ruling spirit in the heart of the individual, democracy means, according to the American point of view, faith in the ultimate rectitude of public impulse and the ultimate wisdom of trained intelligence. As a political system, it is that state in which men have an opportunity to earn freedom through mastery of themselves and likewise a right to govern themselves and others through the exercise of reason, intelligence and sympathy. As a working social theory democracy has greatly advanced its point of view from a theory of politics and philosophy to a theory of social and economic fairness and opportunity from a negative fear of tyrants to a positive hope of perfection."

Continuing, Dr. Alderman said: "If such, then, be the nature of modern democracy, it is very clear that the one thing it cannot do without is the school, and the one thing the school, high or low, cannot do without is a clear notion of how it can train all men not only to perform the duties of free citizenship but can give all men an opportunity to obtain a fair share of the fullness of life. In theory this whole undertaking is one daring, unified, correlated process, and at its summit stands the university, in a peculiar organic sense, the state university, existing both as the symbol and the servant of the spiritual insights and practical needs of its epoch."

Dr. Alderman sees in the growth of education a corresponding growth in the spirit of democracy. "Life or death to American democracy depends upon whether its scheme of education shall be strong, and catholic enough to reach not alone the youth to be educated, but all the forces which surround him and which educate him—companions, family, community, a force which Fichte dreamed his University would be, 'a place from which, as from the spiritual heart of the community, a current of life-energy might be poured through all its members.' The reorganization of political and industrial life on the principle of democracy, and stimulated by the elementary and secondary schools has brought into existence a new world of men. Refusal to administer to the needs of this new world would mean a menace to the body of civilization. To train the tenth man was the function of the ancient university. To train all men, directly or indirectly, is the duty of the American university within whose walls I am convinced the history and destiny of democracy will be shaped."

In concluding Dr. Alderman spoke beautifully

and feelingly of Alma Mater, the State which has nourished her and the new leader who, in days to come, is reverently to minister at her altar:

"Whatever path of service our American universities may choose, and freedom of choice belongs to them, the path of this particular University, entering today so impressively upon a new and confident era in its history, lies clear and shining before it. No just man can deny to it leadership as the chief constructive agent in the building of a new social order in an old, historic State, whose entire history, in weal or woe, in defeat or triumph, is the very epic of the deathlessness of democratic hopes.

"This spot to me is a place of high memories and realities. Here I studied and taught and administered. Here I made acquaintance with the charm of scholarship and the obligation of public service. Here democracy for me ceased to be a theory and embodied itself in living forms. I acclaim with affection and with confidence the new high priest who today takes his place at this altar. Strength to his arm and vision to his brain and steadfastness to his heart; and may Alma Mater live and grow and flourish forever."

Induction Ceremonies

Owing to the urgency of legislation pending before the Legislature of New York, Dr. John H. Finley, President of the University of the State of New York, fourth speaker on the program, was unable to be present. Consequently, Governor Craig introduced former President Francis Preston Venable who thus fittingly presented President Graham for the administration of the oath and induction into office by Walter Clark, Chief Justice of North Carolina, and Governor Craig, Chairman of the Board of Trustees:

"YOUR EXCELLENCY:

"It is my privilege and a great pleasure to present Edward Kidder Graham, who has been chosen as the eighth president of the University of North Carolina. I take much pride in the fact that I have had a share in his teaching and training. I have watched his growth and promise and achievements through his student years and the years of service in the faculty and they give me an assured confidence in his ability and wisdom.

"I present to you the President-elect."

President Graham

Greeted with an outburst of applause, President Graham prefaced his most significant inaugural address, an abstract of which is given below, with the following eloquent reference to his predecessors, three

From Left to Right: Top—Bishop Cheshire, Major London, and Justices of the Supreme Court; Middle—President Alderman, Francis D. Winston, and Others; Bottom—Professors Alexander Graham, D. Matt Thompson, N. W. Walker, Dr. Baskerville, and John A. Parker

of whom. Drs. Battle, Alderman, and Venable, were present to participate in his induction into office:

"This high commission, I receive from the State in a spirit of deep and reverent confidence that does not spring from any thought of personal resource. If all the wealth of treasured memory and hope that this institution represents were an individual responsibility, it would be a burden too heavy to be borne; but this great company of her sons, and her kindred, and her friends is testimony to the wide and loyal fellowship of learning that hedges her securely round about, and makes the individual heart strong enough for anything. Nor less reassuring, as the standard passes to an untried hand, is the host of happy thoughts released by the presence of those who since the reopening gave themselves to her guidance in wisdom and complete devotion. To them today the institution pays the perfect tribute of her abundant life that they gave their strength to promote; to her latest leader, the architect of her material rebuilding, whose wise and patient care inwrought into her standards the ideals of modern scholarship; to his predecessor, whose sympathetic insight and statesmanlike vision gave eloquent expression to the voiceless aspiration of his people and made him their interpreter, both to themselves and to the nation; to his predecessor, whose aggressive and brilliant leadership performed the essential service of making the University a popular right and privilege; to his predecessor—the historian of her heroic past, on whose heart each syllable of her story is written—who lived through a period of bitterness without a hate, who endured poverty without a regret, achieved honor without pride, and who now so deeply shares the eternal youth about him that age finds him with a heart so young and a life so full of affection and praise that he is the witness of his own immortality.

"As the mind dwells on all of this exalted loyalty and unselfish devotion, once again persons, even the most heroic, fade into the background of the cause that evoked their heroisms, and our present ceremonial becomes less the installation of an individual than a reverent and passionate dedication of all of us and all of the energies and powers of all of us to the civilization that the institution exists to serve."

Abstract of the Inaugural Address

The life of the University of North Carolina began with the life of the nation itself; and the period since its reopening in 1875 is the great period of material upbuilding of the North and West. The next great expansion will be in the South, where will be made once more the experiment of translating prosperity in

terms of a great civilization. It is to leadership in this that state universities are called.

State universities originated in the South, but they failed to develop there as democratic institutions because the section was aristocratic. They came into full strength in the West where, as an aggregate of the various colleges of arts, applied science, technical and professional schools, they seek to reassert what past civilizations say to America, together with what America has to say for itself.

The state university is more than an aggregate, however, of institutions that express the culture ideals of culture as learning, culture as research and as vocation; as a university "it is a living unity, an organism at the heart of the living democratic state, interpreting its life, not by parts, nor a summary of parts, but wholly fusing them all into a new culture center, giving birth to a new humanism." The evolution of the state university and of the democratic state have been parallel as they move into the twentieth century from this new center of reality. Each has sought to make of its compartmental life an organism of constructive co-operation. From this new center they are already sending forth new and confident premonitions of fuller and more abundant life under equal opportunity to all of the powers of all men infinitely to expand.

The southern state university is at the vital center of the state's formative material prosperity in industry and agriculture, not only seeking to assist in solving their practical problems, but through showing their larger and deeper relations to make of them liberal vocations—not to save a man from business, but through it; to make of the cropper, a farmer, and of the farmer, man-on-the-farm.

As the organic instrument for realizing the highest aspirations of the living state, one inevitable quality the state university must have: it must be *alive*! sensitively and robustly alive in every vital part of it to the time and needs and place of the people it serves. Not that it would not illustrate in its life the traditions that have made its past nobly useful and beautiful, and seek guidance in the experience of the great of its kind; but that the need of every institution is to assert its original genius that it alone has and can have and that alone gives it value in the world.

Speaking particularly of this University and of the part which he would have it play in the development and enrichment of the life of the State, President Graham said in conclusion:

"Such is the covenant of our immortal mother 'with those who are living and those who are dead

and those who are yet unborn,' building herself 'from immemorial time as each generation kneels and fights and fades.' She will hold secure her priceless heritage from her elder sons as the pledge of the faith she keeps; she will cherish the passionate loyalty of her latest issues with the sacred pride that only a mother knows; she will seek guidance above the confusion of voices that cry out paths of duty about her,

and wholesome life as fresh as the winds of the world that take new tone from its pine-clad plains. Eager, confident, sympathetic, and with understanding heart 'she standeth on the top of the high places, by the way in the places of the path; she crieth out at the entry of the city, at the coming in at the doors, unto you, O men, I call, and my voice is to the sons of men.' "

in the experience of the great of her kind the world over; but she will not in self-contemplation and imitation lose her own creative power and that original genius that alone gives her value in the world. As the Alma Mater of the living State and all the higher aspirations of its people she would draw from it the strength that is as the strength of its everlasting hills, and give answer in terms of whole

Following the address, greetings were extended in short addresses in this order: From state universities, by Dr. George H. Denny, President of the University of Alabama; From Colleges of the State, by Dr. William J. Martin, President of Davidson College; From the public schools, by Dr. James Y. Joyner, Superintendent of Public Instruction; From the alumni, by George Stephens, of the Class of 1896;

From Left to Right: Top—President Graham and Dr. Battle, Mr. Royster and Seniors; Middle—Representatives, Delegates, and Members of the Faculty; Bottom—The Crowd at Memorial Hall

From the Student body, by Thomas Callendine Boushall, of the Class of 1915; from the Faculty, by Lucius Polk McGehee, Dean of the School of Law. Two extracts from the greetings from the student body and alumni respectively voice the prevailing sentiment of the occasion:

"To offer our loyalty to our new President is superfluous, he has won it. To pledge our support is but a form, for we have accepted him as our leader. To assure him of our affection is to question the love of brothers. To rejoice upon this happy occasion is but natural, and to express our happiness is a task of poets—inspired and of laureate fame."

"Throughout the length and breadth of this land, and in lands beyond the seas, are over five thousand loyal alumni for whom I am privileged to stand and in whose name I speak. There are those, some of whom are present, whose service to the University may be counted by the half century. Through them will flow into you inspiration from the rich traditions of the past. Others, well past the meridian of life but workers still, will bring to you the counsel of ripened experience in terms of present day activities. And there is a vast throng that I shall designate as those belonging to your own generation; for them I shall say this, that with you, shoulder to shoulder and heart to heart, we ask to have a working part in the great task that you have so auspiciously begun. In spirit those who are absent and in person those who are here, share with you the joy of this notable occasion, when so distinguished a company has gathered to speak earnest words of greeting in fitting recognition of the great honor that has come to you. The occasion honors, too, our Alma Mater. Her life has been your life, you know her needs, her problems, her opportunities. And now your strength, which has become her strength, will find infinite renewal in the knowledge you have of her greatness. To you and to our Dear Mother, I bring affectionate greetings from the alumni, your brothers and her sons, and here and now we pledge anew to you and to her our loyalty, deeper and more sincere today by reason of the inspiring vision of her future that your leadership has already given us."

The University Hymn was then sung, the benediction was pronounced by Bishop Rondthaler, and the Academic Procession passed out, the audience standing.

THE INAUGURAL LUNCHEON

Six Hundred Persons Enjoy the Menu and Listen to Expressions of Greeting and Good Will

Following the Inaugural Exercises as the second part of the program of the day a most delightful luncheon was served in Swain Hall, the new dining room of the University. Covers for six hundred were laid and nearly every seat was occupied, a new feature in University gatherings of this kind being the presence of a number of ladies throughout the Hall. The menu proved most excellent and was skillfully served by sixty-two members of the student body.

Secretary Daniels, Toastmaster

Presiding as toastmaster, Hon. Josephus Daniels, Secretary of the Navy, brought greetings to the University from President Woodrow Wilson. He then read the following telegram from Dr. George Tayloe Winston, who, at the time, was at Johns Hopkins Hospital and too unwell to be present:

Telegram from Dr. Winston

"I am with you today in spirit, rejoicing over the growth of the State and the University. I propose the following toast:

"The Old North State: May each generation find her a better state to live in, with large freedom of soul and broader mental horizon; and may this happy

evolution be achieved in the future as in the past by her noble University!"

Governor Craig was called on as the first speaker and spoke enthusiastically of the University. Dr. K. P. Battle expressed his delight in having a part in the ceremonies of the day and spoke in a reminiscent vein. He was followed by Former President Venable who referred feelingly to his successor and the years of service he had devoted to the University and State.

Dr. Venable Speaks

"I rejoice to see this day. I rejoice in behalf of my old boy, my dear friend, the staunch and loyal supporter of my administration, Edward Kidder Graham. I rejoice on my own behalf, for the burden of responsibility and care which had grown too heavy for my strength is now rolled off. I rejoice in behalf of the University, for I see before it from this day a growth and development, and an increase of usefulness which no prophet here can measure or place limitations to.

"May I be pardoned if I give a little of ancient history? I came to this dear spot 35 years ago, a boy of 23, expected to take upon me all the duties

DR. C. ALPHONSO SMITH

BISHOP EDWARD RONDTHALER

of a professorship of chemistry without any assistance and with no money. I found here an institution of some half dozen professors, with an income of \$10,500—a very small beginning, but let us not forget that in that day of small beginnings great things were done. There were only some 150 students, but it was sound learning which was taught and that earnest and honest work was done is proved by the fact that out of that small number came our honored toastmaster, the Governor of the State, the President of the University of Virginia, our Superintendent of Public Education, a bishop of the Episcopal Church, and Aycock and McIver who have gone on before. It is hard to measure such a list from so small a number.

"Thirty-five years is a long time, and I am proud to say that in this more than a century and a quarter of the University's history, there are only three men who have exceeded my length of continuous service—Caldwell, the first president, Mitchell, and Dr. James Phillips—and if I can continue my work for a half dozen years longer, I shall then have the record of the longest continuous service in the University. Now, when I think of it, that in these years more boys have come here, and been under my training—whatever that may have meant to them, it has meant a great deal to me—that I have had more of the youth of the State entrusted to my care than any other professor, don't you know that I feel proud of it? And I am grateful to the people of this State that

this opportunity has been granted me of doing such a service."

Greetings from Representatives

Representatives of other institutions and societies were then presented who brought the University and its new head cordial greetings. In this number were, to quote from the *State Journal* Dr. W. Lash Miller, of the University of Ontario, Canada, who brought the greetings of his institution to President Graham on his inauguration and to Dr. Charles H. Herty on his election as president of the American Chemical Society; Miss Marion Reilly, Dean of Bryn Mawr College, who captured her audience with her ease and grace of manner and her cordial greetings for President Graham; Dr. C. Alphonso Smith, of the University of Virginia, who spoke of the dynamic force of education, and referred to the University of North Carolina as once the oldest, but now the youngest of the state universities; Mr. J. J. Blair, superintendent of the Wilmington graded schools, who accounted for being called upon by the toastmaster by the fact that he came from the only available naval base in the State; Prof. W. A. Nitze, of the University of Chicago, who coupled with his greetings congratulation that a professor of English had been chosen President of the University; Dr. D. H. Hill, President of the Agricultural and Mechanical College, who spoke for harmony and co-operation between his institution and the University in the service of the State; Dr. Charles Baskerville, who brought

greetings from the New York Academy of Science and the College of the City of New York, and referred in graceful manner to the instruction given him by Dr. Venable, when a student at the University; Hon. T. W. Bickett, Attorney General of the State, who congratulated President Graham on his close sympathy with the people of the State; Dr. Edwin Mims, of Vanderbilt University, who coupled with his congratulations the prediction that the democra-

tic spirit of this great Commonwealth would be reflected in President Graham's administration; Judge James S. Manning, who foresaw abundant prosperity and success for the new administration.

The Inaugural Reception

At nine o'clock in the Bynum Gymnasium, a brilliant reception was given the University's visitors and guests. The room was beautifully decorated and lighted and the occasion was a most delightful one.

INAUGURATION NOTES

That the University received marked consideration on the part of learned societies and other educational institutions, is clearly demonstrated by the large number of representatives present. In addition to the members of the Legislative Committees, of the Council of State, and of the Supreme Court, who were present in a body, one hundred and twenty-seven persons were delegated as representatives by their institutions. The institutions represented are arranged in the order of the seniority of their organization.

Learned and Professional Societies

American Philosophical Society, Academy of Natural Sciences of Philadelphia, New York Academy of Sciences, Boston Society of Natural History, Smithsonian Institution, American Society of Civil Engineers, American Philological Association, National Education Association of the United States, American Institute of Mining Engineers, American Chemical Society, American Academy of Medicine, American Bar Association, Archaeological Institute of America, American Society of Mechanical Engineers, American Forestry Association, North Carolina Teachers' Assembly, Modern Language Association of America, American Historical Association, American Institute of Electrical Engineers, American Economic Association, Geological Society of America, American Folk Lore Society, New York Academy of Political Science, American Psychological Association, American Mathematical Society, Washington Academy of Sciences, North Carolina Academy of Science, American Society of Zoologists, General Education Board, Carnegie Foundation for the Advancement of Teaching, Federation of American Societies for Experimental Biology, Illuminating Engineering Society.

Universities and Colleges

Harvard University, William and Mary College, Yale University, University of Pennsylvania, Princeton University, Columbia University, Rutgers College, Dartmouth College, Georgetown University,

Salem College, Washington and Lee University, Hampden-Sidney College, University of the State of New York, St. Johns College, University of Pittsburgh, University of Vermont, Williams College, University of Georgia, University of South Carolina, Princeton Theological Seminary, University of Virginia, George Washington University, Amherst College, Trinity College (Conn.), Jefferson Medical College, New York University, Wesleyan University, University of Alabama, Lafayette College, Richmond College, Wake Forest College, Davidson College, University of Michigan, Greensboro College for Women, Medical College of Virginia, Emory and Henry College, University of Missouri, St. Mary's School, The Citadel, Baylor University, State (N. C.) School for the Blind, Beloit College, The College of the City of New York, University of Rochester, Oxford College, Northwestern University, Haverford College, Trinity College (N. C.), Wofford College, Davenport College, Queens College, Peace Institute, Massachusetts Institute of Technology, Swarthmore College, Cornell University, University of Maine, University of Illinois, Purdue University, University of Cincinnati, Stevens Institute of Technology, Smith College, Vanderbilt University, Georgia State School of Agriculture, Wellesley College, The Johns Hopkins University, Bryn Mawr College, University of Texas, Mount Holyoke College, Clark University, Winthrop Normal and Industrial College, Guilford College, Georgia School of Technology, North Carolina College of Agriculture and Mechanic Arts, Elon College, Converse College, North Carolina State Normal and Industrial College, Lenoir College, University of Chicago, Randolph-Macon Woman's College, Southern Presbyterian College, Elizabeth College, Meredith College, Presbyterian Theological Seminary, Louisburg College for Women, Appalachian Training School, University of Florida, Virginia State Normal School at Harrisburg, East Carolina Teachers Training School, Caswell Training School, Rice Institute, Emory University.

Pictures and Scenes

Despite the fact that the morning was slightly lazy, the camera man was everywhere in evidence with the result that many individuals, groups, and general scenes were splendidly caught. The moving picture man was also here with his apparatus, and in the near future the reel reproducing the Academic Procession will be going the circuit of the movies. An order for any of the small-sized pictures appearing in this issue or complete sets of 10, or 20 of the best views, if sent to the Business Manager of THE REVIEW, and accompanied with a check, will be promptly handled, the rate per picture being ten cents each.

Printed Proceedings

THE REVIEW has made no effort to reproduce any of the addresses delivered at the inauguration as the complete formal proceedings will be issued at an early date by the University. A single copy will be supplied to alumni if they will address E. R. Rankin, Chapel Hill, N. C. Additional copies may be secured at the rate of twenty-five cents each. Orders may be placed now to be filled on or after May 25th.

Important Discoveries

Discoveries growing out of the functions comprising the inauguration and worthy of special note were fairly numerous. The first is that Swain Hall hereafter on alumni day can well be thrown open to the wives of the alumni. The presence of ladies at the inaugural luncheon added greatly to the pleasure of the occasion.

It was also clearly demonstrated that the dollar-the-plate scheme, to which members of the faculty and alumni were a party at the luncheon, works to the very decided improvement of the menu. Hereafter, this plan should be adopted for the Alumni Luncheon and the hour or hours spent at the luncheon should be happy and thoroughly satisfying. The dollar-the-course plan will go a long way in bringing that about.

Where shall the next commencement reception and the next and the next be held? Certainly not in the Library after the convincing demonstration that the Bynum Gymnasium is far and away superior to it, and lends itself splendidly to that purpose. The decorations, lights, the space, not to mention the facilities for serving refreshments and the convenient location of dressing rooms, solve what has been one of the University's most difficult problems of entertainment.

Another of these difficult problems to be effectively solved was that of the proper decoration of the various halls in which the exercises were held. Here-

tofore Memorial Hall has successfully defied all effort to make it attractive and give it a happy, gala appearance. But the background of massed greenery, together with the large center piece of flags, wrought a transformation which made its appearance in keeping with the fine spirit of the day. The discovery here, which included Swain Hall and the Gymnasium as well, was the finding of Mrs. Pratt and Mrs. Henderson. They, together with members of the committee and volunteer helpers, brought about the happy change in all the halls used for inaugural purposes. Their contribution was distinctive, and it should be sought on future University occasions.

Committee on Arrangements

The inaugural committee needs no formal congratulations. It witnessed the satisfactory outcome of the plans which it had been maturing since November. Its personnel follows: Archibald Henderson, chairman; A. S. Wheeler, secretary; Joseph Hyde Pratt, A. H. Patterson, L. R. Wilson, J. G. deR. Hamilton, George Howe, and C. H. Herty. Supplementing these was C. T. Woolen, who served with distinction in many places.

The Three Hundred

Thomas C. Boushall, in speaking for the student body, alluded to the spirit of co-operation by which it has been signally actuated during the year. That spirit was finely exhibited at luncheon and supper on the 21st when three hundred boarders at Swain Hall gave up their seats in order that the inaugural luncheon might be served and that there might be quiet in the hall while the toastmaster presented the speakers and greetings to the University were being offered.

Letters, Telegrams, and Press Notices

No event in the history of the University has ever been made the subject of such wide and favorable note by the press of the country as the inauguration of President Graham. Letters, telegrams, news stories, and editorials throughout the entire country, which THE REVIEW does not have space to reproduce, have been received at the Hill and will go into the Inauguration scrap book which is being compiled for the Library under the direction of Dr. J. G. deR. Hamilton.

CAROLINA WINS FROM VIRGINIA AND LOSES TO JOHNS HOPKINS

The third annual series of inter-collegiate debates between Carolina, Virginia, and Johns Hopkins was held April 24th. Carolina won from Virginia but lost to Hopkins. Hopkins won both debates and Virginia lost both.

Representing Carolina, G. A. Martin, of East Bend, and Wade Kornegay, of Chapel Hill, met Virginia at Baltimore. They upheld the affirmative side of the query "Resolved, That the policy of colonial expansion is desirable for the modern State." They received the unanimous vote of the judges.

At Charlottesville, C. E. Blackstock, of Weaver-ville, and W. B. Umstead, of Bahama, defended the negative side of the query against Hopkins. They were defeated by a unanimous vote of the judges.

The debate between Hopkins and Virginia was held in Gerrard Hall. President E. K. Graham presided and J. F. Hackler acted as secretary. The decision of the judges, who were members of the University faculty, stood four to one in favor of the Hopkins debaters. C. N. Cox and B. C. Taylor represented the affirmative for Virginia, while A. M. Warren and T. J. Tingly represented the negative for Hopkins. Immediately after the debate a reception was given the visiting teams in the Y. M. C. A.

CAROLINA 10, WAKE FOREST 0

Carolina won the second game from Wake Forest in Raleigh by the score of 10 to 0. Shields was at his best. He was reinforced by the swift fielding of the whole team and the heavy hitting of Honig, Patterson and Bruce. Lewis got two hits and Zollicoffer a two bagger. Ellis who started for Wake Forest was replaced by Moore but the story had been told when Honig hit a homerun with three on.

			R	H	E
Carolina	161	000	200	—10	11 3
Wake Forest	000	000	000	—0	5 6

CAROLINA 3, VIRGINIA 5

Carolina lost the third and deciding game from Virginia by the score of 5 to 3. Williams, who had been successful as a relief pitcher in Greensboro and as the victorious speedman in Durham, was driven from the mound in the second inning at Charlottesville. Shields replaced Williams and held the Virginians to one additional run. Zollicoffer counted on errors in the third. Honig for Carolina hit a homerun in the fourth and hits by Bruce and Bailey added the other run in the ninth.

			R	H	E
Carolina	001	100	001	—3	3 3
Virginia	040	001	00x	—5	10 4

Williams, Shields and Woodall; Gammon and Erlman.

CAROLINA 8, W. & L. 2

Williams recovered form the day following his second inning blow-up at Charlottesville and held the

strong Washington and Lee team to four hits and two runs. Bruce, Bailey and Lewis hit homeruns. The fielding of Pope, Honig, and Bruce was gilded and at times spectacular.

			R	H	E
Carolina	001	101	221	—8	10 2
W. & L.	002	000	000	—2	5 3

Williams and Woodall; Pierotti and Sweetland.
Two base hits, Lewis and Wodall; three base hit, Patterson; homeruns, Bailey, Bruce, Lewis and Young. Struck out by Williams 10, by Pierotti 7.

CAROLINA 13, V. M. I. 0

Currie shut out V. M. I. in Lexington and his teammates by heavy hitting rolled up thirteen runs. Woodall, Bruce and Zollicoffer secured nine of the nineteen hits. Bucher of the cadets was relieved by Pitts.

			R	H	E
Carolina	005	213	101	—13	19 2
V. M. I.	000	000	000	—0	8 6

Currie and Woodall and Hart; Bucher, Pitts, and Malone.

Two base hits, Zollicoffer, Hart, and Bruce. Three base hit, Honig. Struck out by Pitts 4, Currie 11.

CAROLINA 8, NAVY 2

Shields pitched airtight ball and held the Navy to five hits. In the eighth with the score 2 to 1 against her Carolina unloosed the bats of war and by the end of the ninth had sent five reserves to the home base. Woodall hit a homerun, Zollicoffer led the hitting. G. Fisher of the Navy secured three of the sailor's five hits.

			R	H	E
Carolina	000	100	043	—8	8 3
Navy	000	010	100	—2	5 5

CAROLINA 4, PRINCETON 8

Carolina ended the northern trip with a defeat by Princeton at Princeton 8 to 4. Williams was hit hard.

			R	H	E
Carolina	100	010	020	—4	6 4
Princeton	100	022	21x	—8	10 2

Williams, Currie, and Woodall; Chaplin and Driggs.

HIGH SCHOOL TRACK MEET

For the second consecutive time the Friendship High School won the inter-scholastic track meet of North Carolina. Forty high school boys participated with the following result:

Friendship 40, Greensboro 35, Graham 25, and High Point 9. Linn Homewood won 19 of Friendship points. Greensboro won the relay race.

LARGELY ATTENDED REUNIONS EXPECTED

Indications are that the reunions of the classes of 1865, 1890, 1895, 1900, 1905, 1910, and 1914, to be held at commencement will be successful in every respect. A great many members of these classes have signified their intention of being present in letters to their respective class secretaries and to the alumni organization committee of the University.

Tuesday, June 1, is Alumni Day. It will be given over entirely to the alumni, and the reunions will be the most interesting features of the day. At the general meeting on Tuesday morning each class will have a few minutes at its disposal. The alumni luncheon will be held at 1:30 o'clock Tuesday afternoon. After the luncheon there will be one or more baseball games between teams representing various classes. During intermissions alumni "stunts" will be pulled off.

Tuesday night will be spent in such ways as the members of the classes prefer. Class dinners, banquets, or smokers will probably be the order of the hour.

EXTENSION LECTURES

The Bureau of Extension announces the following lectures and commencement addresses covering the month of May.

C. L. Raper, Parkton, 10th; Monroe, 20th; Winston-Salem, 28th.

M. H. Stacy, Lexington, 6th; Bessemer City, 11th; Sanford, 18th; Bonlee, 19th; Raleigh, 28th.

Zebulon Judd, University, 7th; Graham, 7th; Eureka, 8th; Enfield, 13th; Ahoskie, 18th; Carthage, 21st; Scotland Neck, 26th.

L. A. Williams, Mt. Ulla, 12th; Pikeville, 18th; Hertford, 25th.

H. W. Chase, Randleman, 4th.

A. H. Patterson, Red Oak, 6th; Franklinton, 6th. Collier Cobb, Matthews, 11th; Wadesboro, 11th.

M. C. S. Noble, Grifton, 8th; Seaboard, 13th; Mamdale, 15th.

J. B. Bullitt, Robersonville, 21st.

W. S. Bernard, Concord, 6th.

CHEMISTRY BOOKS FOR GRADUATES

The second number of the *Carolina Chemist*, published by the department of Chemistry, contains a list of the journals to be found in the Chemistry library. In order that these may be at the service of former students, the department announces that it will loan volumes upon the payment of transportation charges.

DI WINS FRESH-SOPH DEBATE

The annual Fresh-Soph debate between the Di and Phi Societies was held April 28th in Gerrard Hall. The Di representatives were victorious by a two to one vote of the judges. The query was "Resolved, That a literacy test for immigrants seeking admission to the United States is undesirable." W. H. Stephenson, of Raleigh, and Oliver Rand, of Smithfield, representing the Phi, upheld the affirmative, and C. L. Snider, of Denton, and R. M. Ross, Jr., of Shelby, representing the Di, defended the negative. The judges were Messrs. W. DeB. McNider, H. M. Dargan, and H. W. Starr.

DR. SMITH SPEAKS BEFORE Y. M. C. A.

Dr. Henry Louis Smith spoke before the Young Men's Christian Association Tuesday night April 20th. His subject was "Personality" and in its interesting development he held the rapt attention of the large body of students present. Overflowing health, energy, human friendliness, and height of ideals were emphasized and illustrated as the essentials of personality. The address was pronounced one of the strongest of the year's list that includes those of Mott, W. S. Hall, A. C. Hart, G. C. Hounshell, A. S. Taylor, and W. D. Weatherford.

INFORMATION WANTED

The undersigned desires to hear from persons who have in their possession the badges of the old extinct fraternities of Alpha Omega, Epsilon Alpha, Phi Kappa Alpha, Iota Zeta Theta and the antebellum Kappa Alpha, which existed at the University of North Carolina at the beginning of the Civil War. A description of these badges is desired for an article on extinct Southern fraternities. I will pay ten dollars for a badge of the last mentioned fraternity.

LEROY S. BOYD.

604 Harvard Street, N. W., Washington, D. C.

HIGH SCHOOL CHAMPIONSHIP

While THE REVIEW is in press the second annual championship contest in baseball among the high schools of the State is in progress. The schools taking part in the west are Sylvan and Cherryville, in the east Raleigh, New Bern, Washington, Clayton, and Pikeville.

SHIELDS IS CAPTAIN

Leon Shields, one of Carolina's leading mound-men, has been elected captain of the Varsity for 1916. He succeeds Lawrence Woodall who played in his last college game against Elon on Saturday, May 1.

THE ALUMNI REVIEW

To be issued monthly except in July, August, and September, by the General Alumni Association of the University of North Carolina.

Board of Publication

THE REVIEW is edited by the following Board of Publication:

Louis R. Wilson, '99.....Editor

A NEW COLLEGE PRESIDENT

Today the University of North Carolina established as its new President Dr. Edward Kidder Graham, a man quite young yet of almost exactly the same number of years which the University itself has lived since its reconstruction in 1875. By his inaugural address President Graham voiced not only the larger traditions which have come down from the University's earlier past—a history that began almost with the history of the United States—but also the significance of the reconstructive years which he himself has known and helped to render effective. Dr. Graham appeared abundantly conscious of the leadership which the universities of the South must assume in the present years when, the foundations being rebuilt, the structure itself of material and mental prosperity waits to be reared.

President Graham, as he surveyed the immediate needs which the University of North Carolina must seek to meet among the people of its State, the new possibilities in learning and research which the South's recovered vitality opens, discovered the modern ideal of symmetry which the institution must constantly raise for itself. Thus, though North Carolina needs vocational training, Dr. Graham reminded his fellows that "democracy has come to

mean more than an aggregate of vocations, grouped for the purpose of material exploitation. The whole efforts of the productive state is to unify its life, not by easting out material good, but by interpreting and using it in its symmetrical upbuilding. The state university is not so much concerned with doing a certain set of things, as infusing the way of doing all things with a certain ideal. Not by spasmodic reform, not by sentiment, nor by the expiations of philanthropy, but by understanding, eritieism, research and applied knowledge it would reveal the unity of the channels through which life flows, and minister to the purification of its currents." Here is no mere rhetoric—though it were wrong to pass Dr. Graham's speech without some comment on the eloquent flow of its diction—but an ideal whereon North Carolina's new President may carry his college to fine and practical attainment.—*Boston Transcript*.

THE UNIVERSITY

The inauguration yesterday of Edward Kidder Graham as president of the University of North Carolina calls attention to the notable progress of that oldest of state universities in making itself an efficient servant of the commonwealth. The work of Mr. Graham, as Dean and Acting-President, has for nearly ten years been an example to other Southern institutions of the same sort. While the activities of the University have followed the general lines laid down in middle west education, they have in some ways been original. Night schools have been established for negroes, correspondence courses for industrial workers, summer school courses for public school teachers, rural life conferences for those interested in the improvement of rural conditions and a permanent system of county and state highways. Package libraries reach nearly 500 communities, and a series of extension bulletins has been scattered broadcast to interest the State in questions relating to school, home, and city and state government. The 'community service week' initiated by the University has now been made an official State event. In his inaugural yesterday President Graham indicated that the extension service would be given increased attention, and already a special bureau has been provided to carry it on. What has been done thus far has been upon an income probably less than one-tenth that of the universities of Illinois or Wisconsin. In other Southern states—Georgia, Alabama, Florida, Mississippi—there is a field as wide as in North Carolina: their under-nourished state universities should find inspiration in the work of their neighbor.—*New York Evening Post*.

UNIVERSITY EXCHANGE LECTURESHP

During the week beginning April 26, Professor William M. Thornton, Dean of the School of Engineering, University of Virginia, lectured here as first exchange lecturer on the foundation established for the Universities of South Carolina, Vanderbilt, Virginia and North Carolina.

On the evening of April 26, Professor Thornton gave a general lecture in Gerrard Hall on the Panama Canal. On account of his personal acquaintance with General Goethals and his knowledge of the details of the canal, acquired during a visit to Panama, he was enabled to speak with authority and intimacy upon the subject. In especial he dwelt upon the important part played by Southern men in this great engineering undertaking, and the wonderful work of sanitation which had been done on the Isthmus. An inspiring story, this, to all Americans, and told by one who knows.

On the evening of April 27, in the Peabody Building, Professor Thornton spoke before the Elisha Mitchell Scientific Society on the topic: "The Education a Young Man Needs to Fit Him to Become an Engineer." The lecturer treated the subject fundamentally, analyzed conditions in the high school, subjected certain prevailing practices to criticism, and laid down concisely his conception of the basic principles of engineering education and practice.

In his technical lectures, the first of which was given in the Chemical Lecture Room, the remainder in the Peabody Building, Professor Thornton spoke on "Accelerated Methods of Analysis as Applied to the Strength of Materials." The first lecture was devoted to an historical summary of the development of the subject of mechanics of materials, with some analysis of the work of the principal elasticians. In his remaining lectures, which were more technically treated, he took up a fundamental problem, that of the deflection of a beam under varying conditions of loading, and studied it from three points of view: the graphical method, the resilience method, and the method of least work. By means of demonstrations conspicuous for simplicity, Professor Thornton exhibited with singular lucidity the underlying principles of the subject and dwelt upon the necessity for the cultivation of the scientific spirit of self-reliance which arises from a mastery of those underlying principles.

The advantages accruing from this new development in the idea of university extension have been most happily and strikingly exhibited in the visit of Professor Thornton. The spirit of scholarship has been exemplified, the value and importance of re-

search have been accentuated, and intellectual interest and curiosity have been stimulated in a high degree. The University of North Carolina places faith in this new system of intranational exchange, which bids fair to produce many of the beneficial results which have arisen out of the great systems of international exchange.

CAMPUS AND TOWN

Dr. Louis R. Wilson was elected a member of the executive committee of the National Association for University Extension at the conference of that organization held at Madison, Wis., March 10-13.

Dr. Richard Burton, of the University of Minnesota and president of the Dramatic League of America, lectured in Gerrard Hall Tuesday night, April 6th. His subject was "Bernard Shaw, the Wittiest Man Alive."

The sessions of the Southern Conference for Education and Industry, which were held at Chattanooga, Tenn., April 27-30, were attended by Professors N. W. Walker, L. A. Williams, C. H. Herty, and Zebulon Judd, from the University faculty.

In the annual State intercollegiate track meet held at Trinity College, Durham, May 3rd, Carolina was easily the winner of first place. The score stood Carolina 64, Trinity 40, A. & M. 35, Wake Forest 14.

Dr. W. Lash Miller, professor of physical chemistry at the University of Toronto, addressed the Chemistry Journal Club during his visit at the Inauguration.

Dr. J. G. de R. Hamilton is contributing a series of articles to the Sunday Charlotte *Observer* on "Party Politics in North Carolina from 1835 to 1860."

The current issue of Classical Philology contains an article by the late Prof. C. W. Bain, entitled *Varia Latina*—Notes on Syntax.

DR. WHEELER ELECTED PRESIDENT

At the meeting of the North Carolina Academy of Science at Wake Forest, April 30 and May 1, Dr. A. S. Wheeler, of the Department of Chemistry, was elected president. Other members of the faculty attending the meeting were Messrs. A. H. Patterson, T. F. Hickerson, W. C. George, Collier Cobb, and J. E. Smith.

THE GENERAL ALUMNI ASSOCIATION of the UNIVERSITY OF NORTH CAROLINA

Officers of the Association

Julian S. Carr, '66.....President
Walter Murphy, '92.....Secretary

THE ALUMNI

E. R. RANKIN '13, Alumni Editor

ALUMNI PRESENT FOR INAUGURATION

Among the alumni present for the inauguration of President Graham were:

Governor Locke Craig, Secretary of the Navy Josephus Daniels, Edwin A. Alderman, F. D. Winston, J. S. Manning, J. Bryan Grimes, J. D. Grimes, J. Y. Joyner, George Stephens, R. D. W. Connor, T. W. Bickett, D. F. Giles, F. M. Harper, G. B. Phillips, Albert L. Cox, R. S. Busbee, A. G. Mangum, V. S. Bryant, F. W. Morrison, A. M. Scales, Walter Clark, Walter Clark, Jr., K. S. Tanner, N. S. Plummer, J. F. Spruill, R. G. Kittrell, R. S. Hutchison, J. S. Mann, H. E. Rondthaler, R. H. Wright, J. I. Foust, K. P. Battle, T. H. Battle, S. B. Turrentine, A. H. Bahnson, C. G. Keeble, J. A. Parker, S. H. Farabee, O. J. Coffin, W. T. Bost, Carter Dalton, S. M. Gattis, P. D. Walker, Paul Schenck, Geo. Thomas, W. A. Graham, A. J. Feild, G. M. Garren, J. L. Burgess, T. W. Andrews, Jas. A. Gray, Jr., J. L. Patterson, D. C. McRae, F. E. Winslow, W. L. Long, W. L. Currie, C. W. Tillett, Jr., J. W. Umstead, Jr., C. W. Howard, Miss Watson Kasey, C. M. Carr, N. A. Townsend, B. K. Lassiter, Lawrence McRae, Cameron McRae, J. K. Wilson, E. R. Buchan, C. L. Williams, S. C. Brawley, C. E. Johnson, Jr., Jno. Webb, S. I. Parker, R. O. Everett, W. T. Whitsett, J. B. Scarborough, H. L. Cox, H. H. Horne, W. D. Carmichael, J. T. Reece, W. S. Coulter, J. Q. Jackson, R. H. Sykes, J. W. Hester, J. L. Morehead, C. L. VanNoppen, A. J. Warren, W. F. Taylor, Alex Graham, Chas. Baskerville, Cyrus Thompson, Jr., J. W. Graham, Harry Solomon, H. V. P. Vreeland, Stahle Linn, F. C. Archer, R. B. Redwine, L. P. McLendon, A. J. Barwick, J. C. Biggs, J. F. Webb, A. S. Root, P. E. Seagle, W. L. Hill, N. D. Bitting, W. L. Foushee, Marsden Bellamy, Louis Goodman, Leslie Weil, M. T. Plyler, W. N. Everett, L. S. Holt, Jr., Graham Woodard, C. A. Shore, Miss Daisy Allen, Perrin Busbee, H. A. London, R. H. Lewis, W. A. Guthrie, J. S. Hill, W. M. Allen, M. L. John, J. B. Cranmer, J. S. Cunningham, T. R. Foust, Walter Murphy, S. Kitasawa, F. I. Sutton, T. W. Davis.

Among the trustees present who are not alumni were: Bennehan Cameron, F. P. Hobgood, Geo. B. McLeod, Charles Lee Smith.
